

Project Manager

Would you like to deliver safety to the Oil & Gas Industry? We are the leading provider of ATEX & IECEx certified hot work habitats. We currently have a vacancy for a customer facing Project Manager at our site in Aberdeen, Scotland.

As a Project Manager, you will be reporting directly into the Technical Director and working with our key stakeholders such as: suppliers, project teams, as well as interfacing with customers. This role will provide you with the opportunity to work on a portfolio of projects from bit to completion.

Some travel will be required to various sites, and globally, on an ad-hoc basis.

We pride ourselves on employing the best professionals around. Join us and you'll be part of something important; something you can be proud of.

As a growing business, we are continually looking for Project Management experience at all levels. Opportunities may also exist for Senior Project Manager's and Project Engineer's.

Your main responsibilities as a Project Manager will involve:

- Maintain a firm commitment to safety behaviors and protocols that lead to an incident and injury free project site
- Developing and maintaining a detailed project plan that embraces all elements of the project
- Ensure projects are delivered to meet safety, quality, financial and schedule objectives
- Schedule and facilitate all project meetings required to successfully coordinate work activity
- Prepare and deliver project status reports, and keep management informed of project status
- Using project management techniques, to enable early identification of problems and implementation of mitigation actions
- Achieving the agreed project cost, sales, margin and cash flow targets
- Managing a small multi-functional team

Your skills and qualifications as a Project Manager:

- Proven written and verbal communication abilities; proficiency with computer applications including Microsoft Office Suite. Ability to read, understand and interpret contract documents, drawings, specifications, scopes of work and project schedule
- Proven experience of developing and maintaining excellent customer relations
- Managing the project or bid to ensure all milestones and objectives are achieved
- Demonstrated ability to make decisions with clarity in an environment of ambiguity & uncertainty
- Broad cross functional business experience would be desirable
- Proven Track record in safe delivery of projects
- Educated to degree level or equivalent - business or engineering desirable
- A formal project management qualification (e.g. APMP, PMQ, PMP or Prince 2)

Desirable skills:

- Ideally experience in the Oil & Gas service business
- Experience of IEC & ATEX standards and directives
- CompEx Qualifications

What we're looking for in you:

You will have strong well-rounded business knowledge with a proven ability to build long lasting relationships with customers. We pride ourselves on behaviours, so the successful individual must be a role model in terms of exhibiting collaborative, constructive and motivational behaviour; and must have demonstrated the ability to achieve results through positively influencing others. You'll have the opportunity to work from bit to completion, giving you real ownership of projects. Whatever you do, you'll have the satisfaction of knowing you're making a difference to people's lives.

Location: Altens, Aberdeen, Scotland

Salary: Competitive - dependent on experience

Benefits: Our employees receive an excellent benefits package which includes a competitive pension scheme, enhanced annual leave allowance, and a Company profit sharing plan.
